

SERVICES

- From components supply to fully financed turnkey Public-Private-Partnership (PPP) scheme
- Feasibility studies
- Analysis, design, planning and project management
- Supply and operation of high-tech equipment and a state of the art platform
- Comprehensive maintenance and technical assistance
- Data collection and reporting
- Training, capacity building and know-how transfer

KEY BENEFITS

- Transparent, interactive and 24/7 real-time monitoring
- Deterring shipment theft, smuggling and loss
- Faster intervention in case of detected abnormalities
- Customs empowerment
- Trade facilitation
- Reduced reliance on manned security escorts
- Strengthened national security
- High-level reporting through statistics and key performance indicators

NEED TO SECURE AND MONITOR THE MOVEMENT OF TRANSIT CARGOES?

Cotrack® is Cotecna's proprietary transit monitoring solution, specifically designed and developed for Customs.

Fully transferable under a BOT scheme, it reinforces Customs' capacity to better control transit and efficiently fight against fraud whilst facilitating trade.

Based on state of the art GPS, telecommunications and RFID technologies, Cotrack® provides real time evidence of the location of transit cargoes.

It generates alerts on abnormal events that could occur during transit journeys such as container door opening, deviation from authorized routes, stops in risky areas and delays above legal transit times.

Also suitable for trains, barges and tank trucks, our bespoke tracking solution not only ensures the integrity of consignments in transit but also reduces delays at borders and accelerates the release of the transit bond.

Seamlessly integrated with other Customs systems, Cotrack® will give you a detailed insight on transit realities.

Cotecna provides a modular and scalable service offering that brings immediate and sustainable benefits to both Customs Authorities and the trade community.

A PUBLIC PRIVATE PARTNERSHIP (PPP) WITH COTECNA

40 YEARS

of experience in trade facilitation, PPP and Government projects

NO UPFRONT INVESTMENT:

Cotecna can finance up to 100% of the project

ACCOUNTABILITY:

Cotecna bears the financial and delivery risks

EFFICIENCY:

Cotecna maintains the equipment and systems at their highest level of operability

MISSION FOCUS:

Freed from logistic and technical aspects, Customs administrations can dedicate themselves to their core missions

LONG TERM SUSTAINABILITY:

Cotecna ensures fluid processes and guarantees the uptime availability of the equipment and facilities

EMPOWERMENT:

Cotecna invests in on-going capacity building to enable the Authorities to take over full responsibility of the solution

DESIGNED AND MANUFACTURED BY COTECNA FOR CUSTOMS AND SECURITY SERVICES

A FIELD PROVEN SOLUTION THAT ENHANCES CUSTOMS' CAPABILITIES

Adaptable to each environment, Cotrack® is a flexible solution tailored to meet specific Customs needs and requirements.

It integrates the following components:

- Customs transit management and monitoring platform,
- Removable tracking units (GPS, GSM and/or satellite communication, RFID link, internally powered, tamper sensors, etc.),
- Fixed tracking units to equip Customs patrol vehicles (GSM and/or satellite communication, etc.),
- E-seals (long range RFID communication, suitable for all cargoes, security features, etc.).

Combined with Cowatch, our container security solution, Cotrack® guarantees an end to end security and monitoring of all cargoes.
